

# Construction Site Access Control & Visitor Management Solution

EvTrack offers a robust, all-in-one solution designed to enhance security at construction sites. Our system streamlines access control for contractors, sub-contractors, and professional teams alike, while efficiently managing visitor and delivery access to the site

Replace Manual Paper Security Books with EvTrack

# Key Features

## Unified Access Control and Visitor Management

EvTrack features integrated access/control with support for access/control points, groups and schedules.

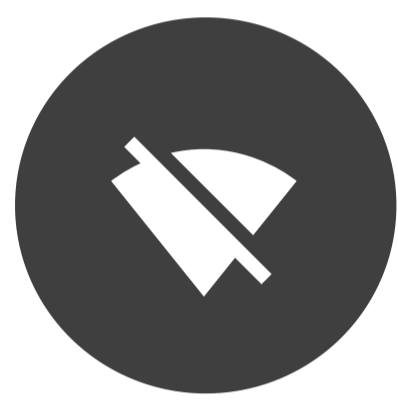

## Visitor Pre-Registration or Registration at the Physical Access/Control Point

Visitors can be pre-registered prior to visiting the site or they can be registered using our EvTrack guard device at the access/control point itself.

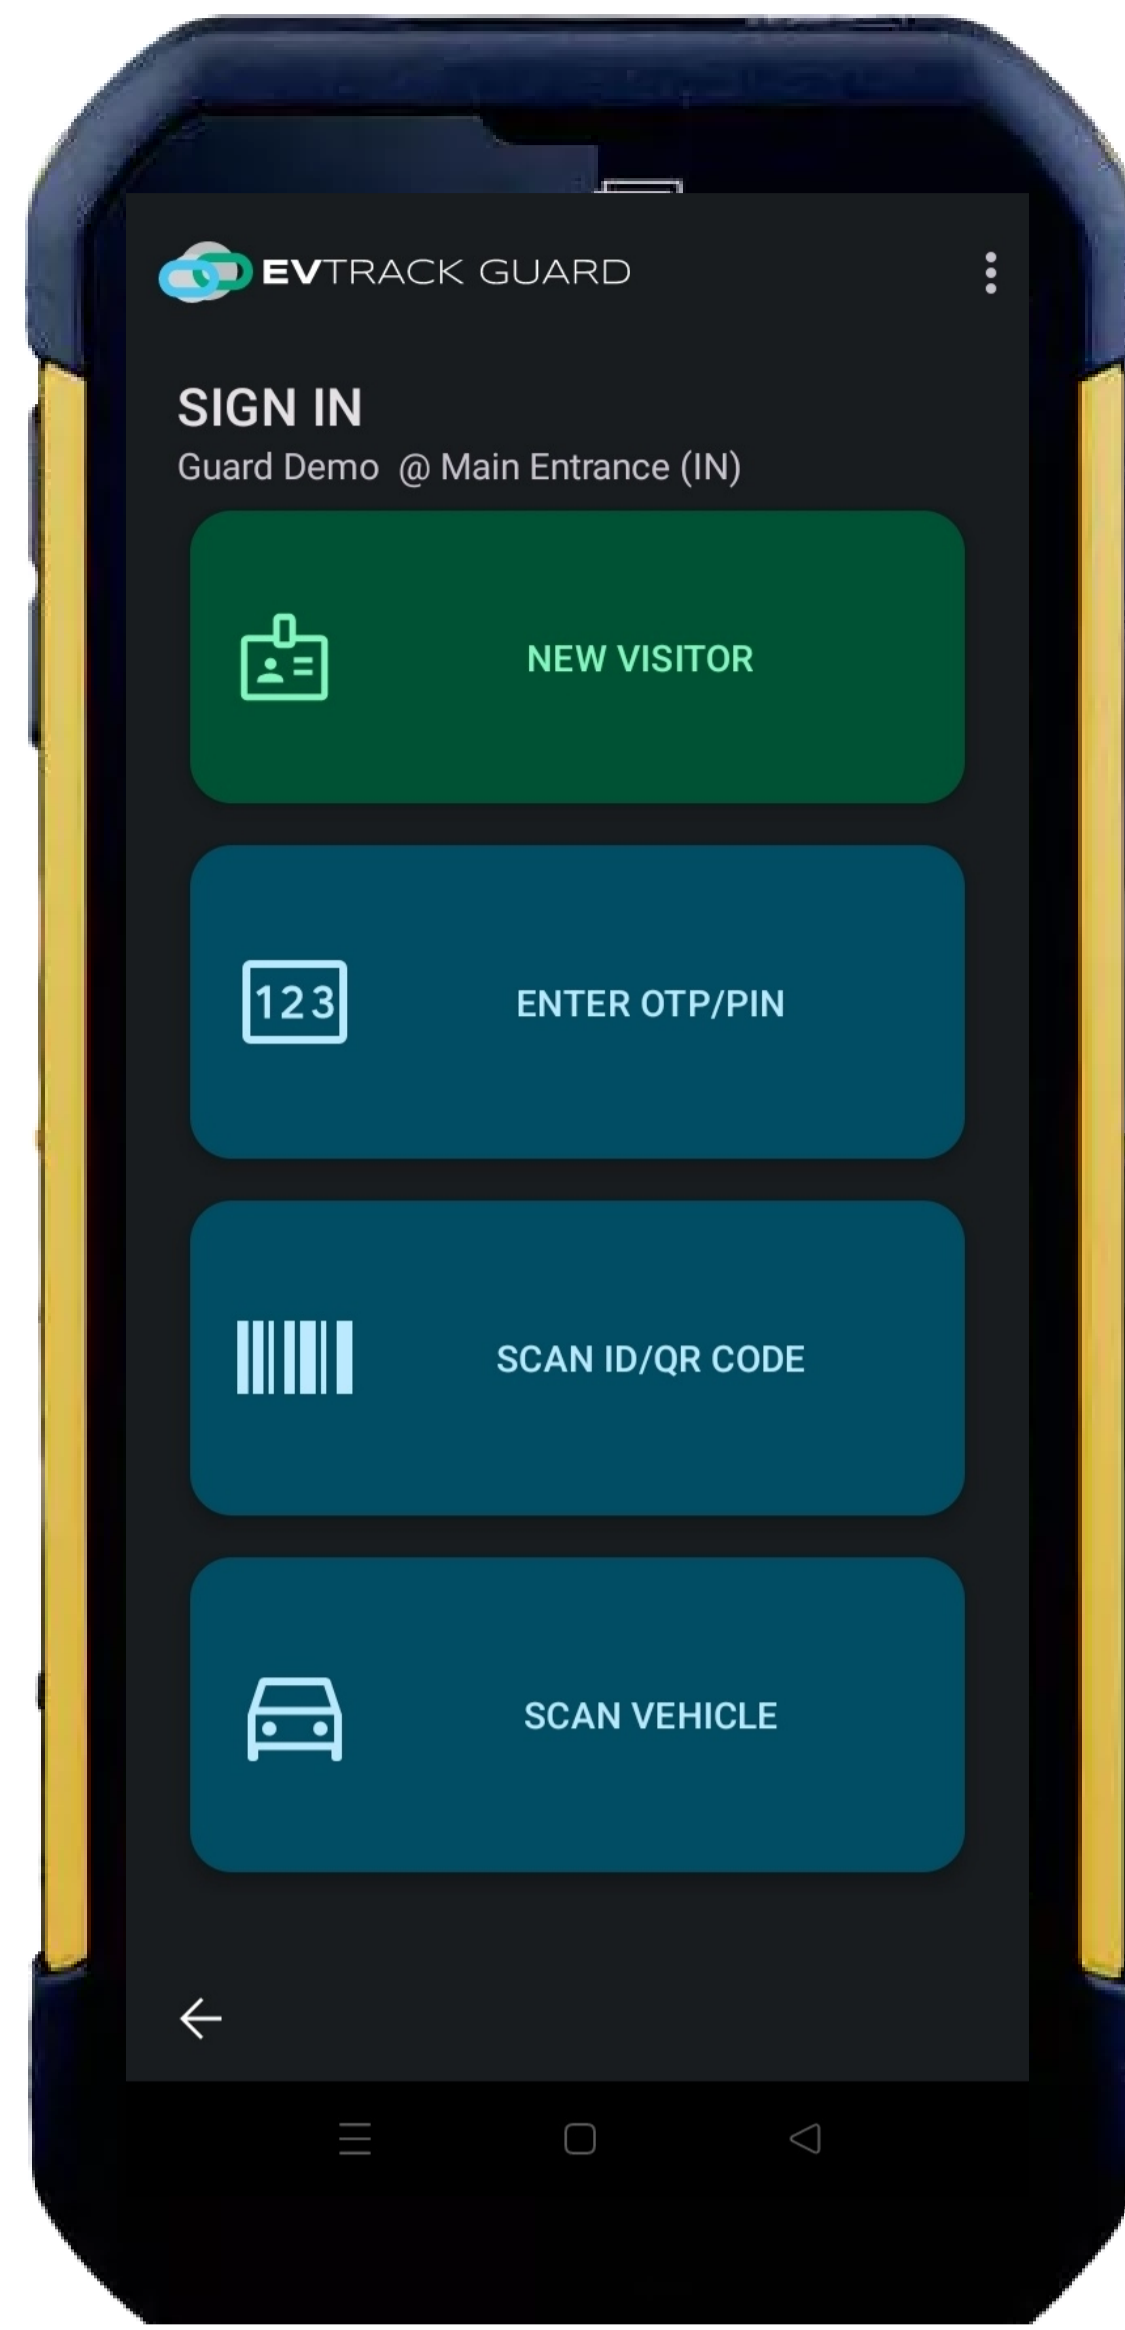

## Reporting

Reports can be generated from EvTrack providing details of all system transactions as well visitor reports, access control logs, time/attendance csv files and more.

## Offline Transactions

If the WiFi connection is lost on the handheld guard device or there is no connection to the server. No captured visitor data is lost. This data is encrypted, stored, queued and resent when connectivity is restored

EvTrack Guard App

## QR Code

EvTrack is able to use QR codes as temporary or permanent access/control credentials. These can be sent in the form of visitor passes by email or printed on a personnel badge.

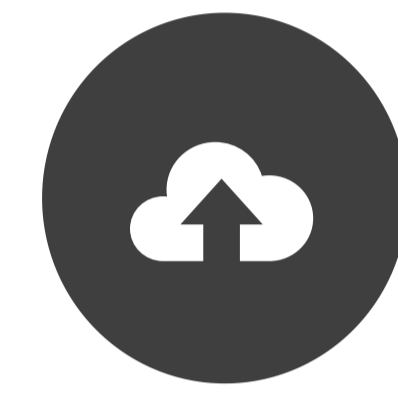

## Host Notification Via Email or SMS

Hosts are notified of new visitors by SMS and/or Email. In addition OTP's & QR codes are also sent automatically from the system via SMS or Email.

## ID & Drivers License Scanning

Through our handheld EvTrack guard device, scanning of barcoded drivers licenses and national ID cards are supported. Data is inputted directly into the system automating the guards work.

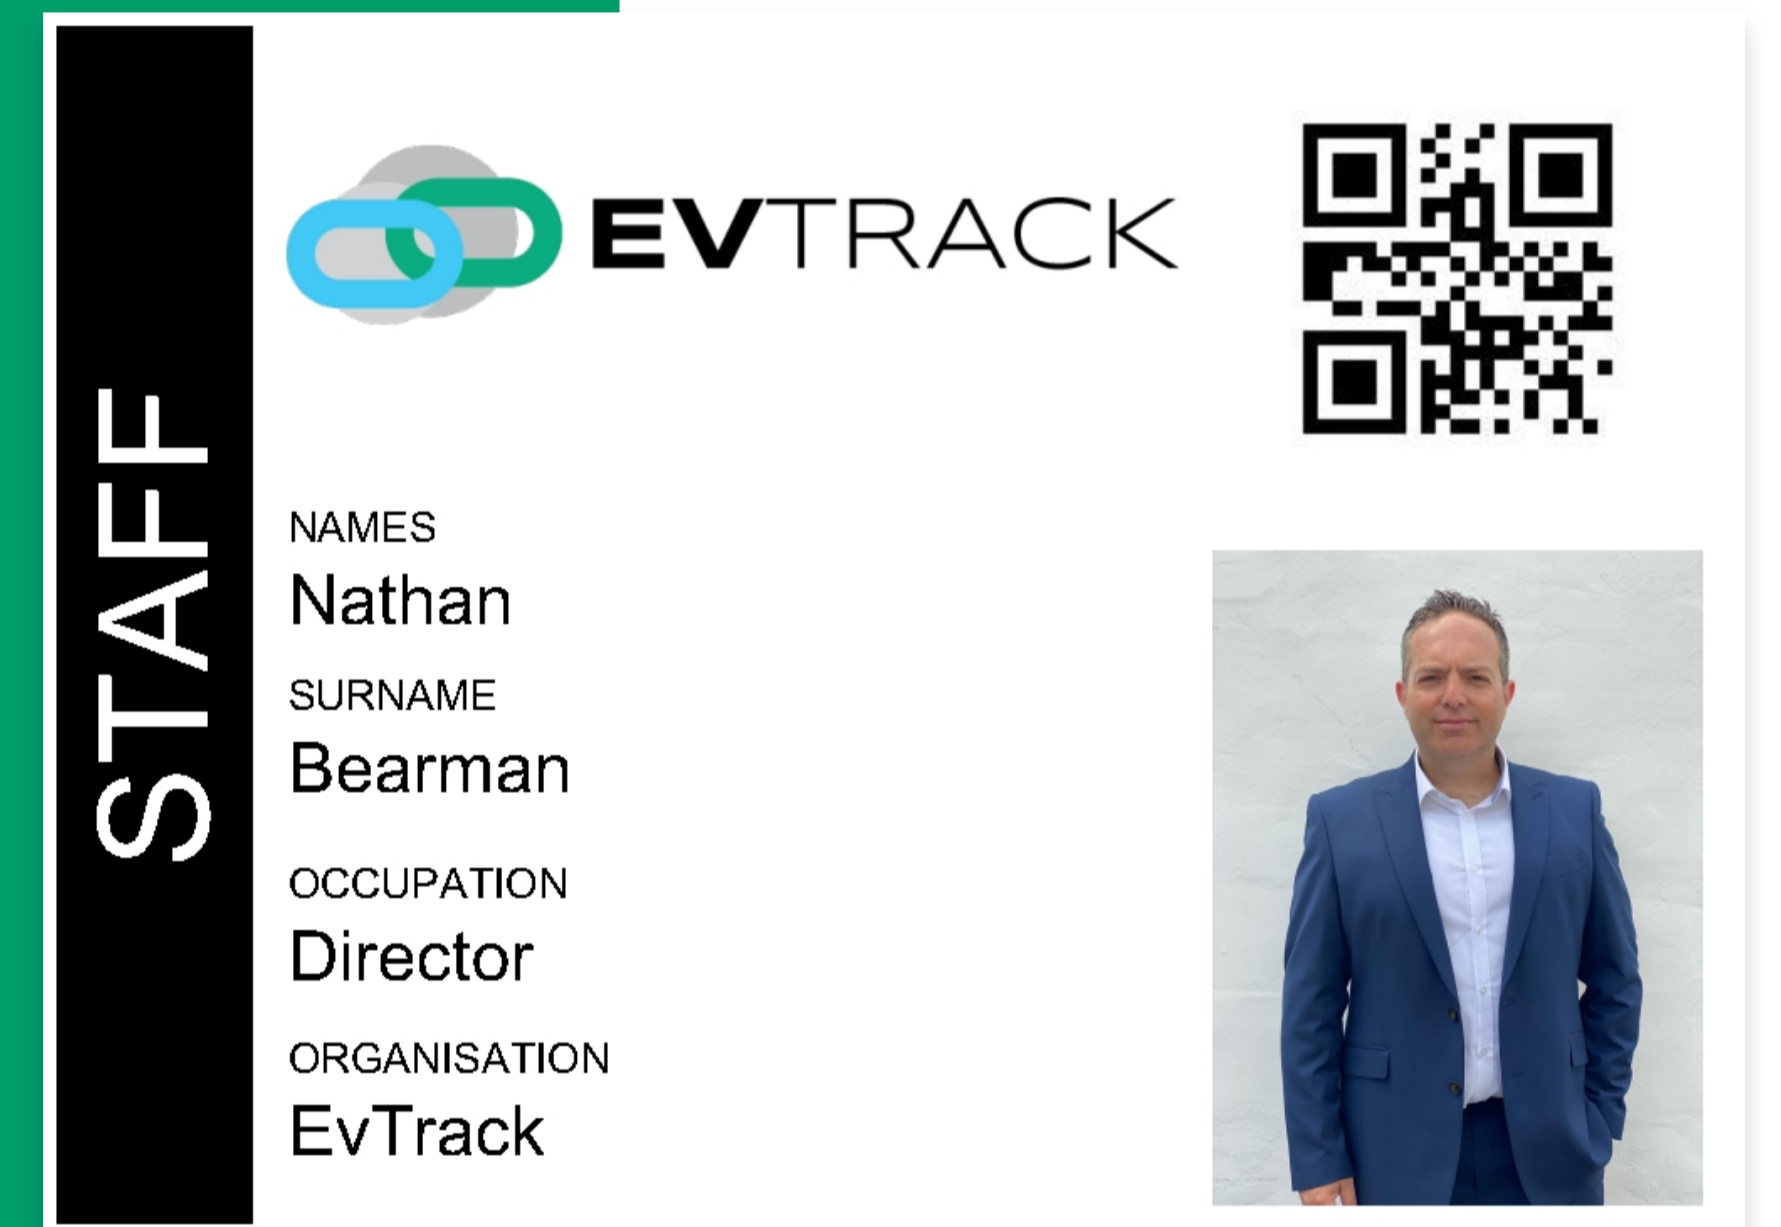

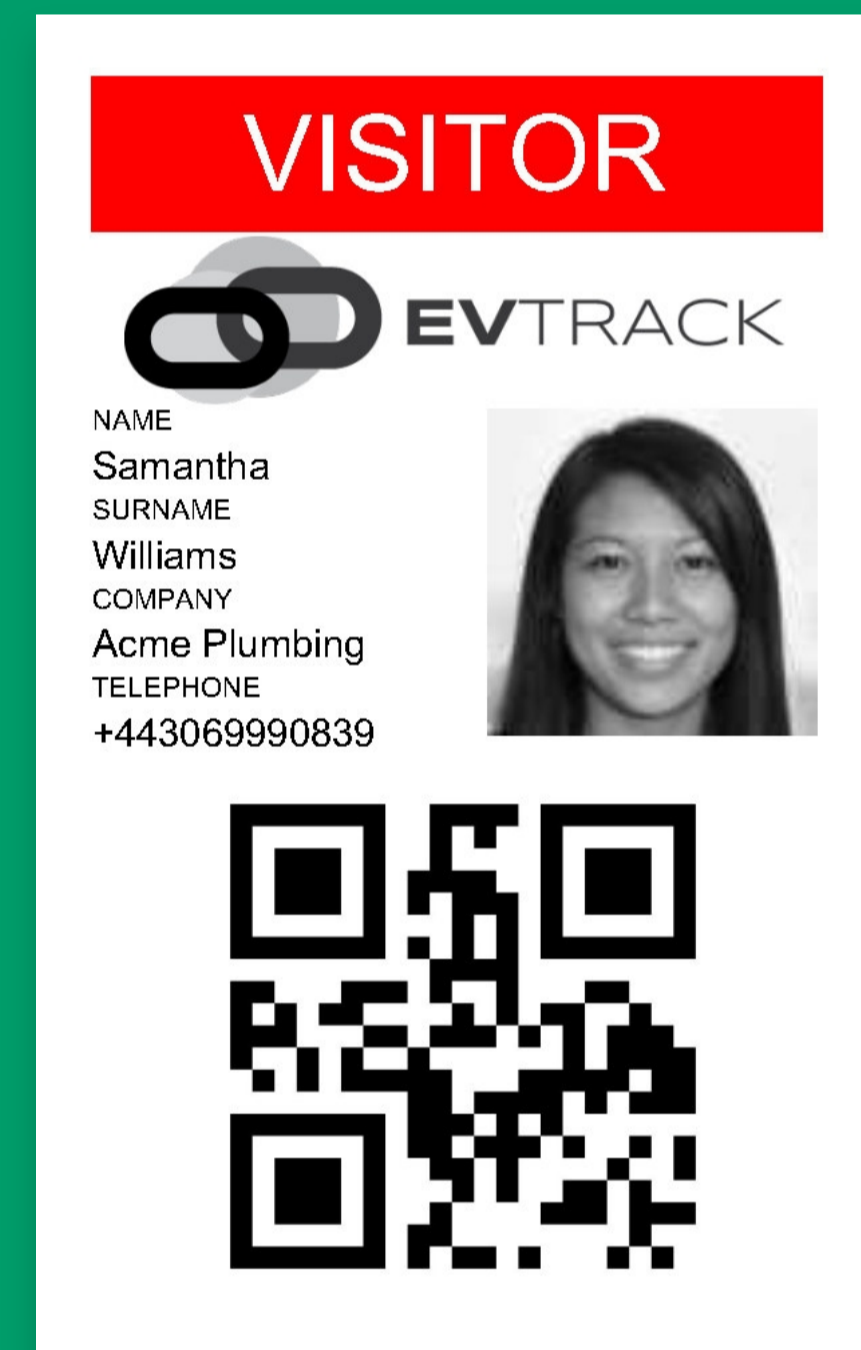

## Cloud-Based

EvTrack is available as standard as a cloud-based solution and no server is required onsite in order for the system to operate. We also offer an on-remise server version for corporate or government clients.
