

# STUDENT ACCOMMODATION

## ACCESS CONTROL APPLICATION NOTE

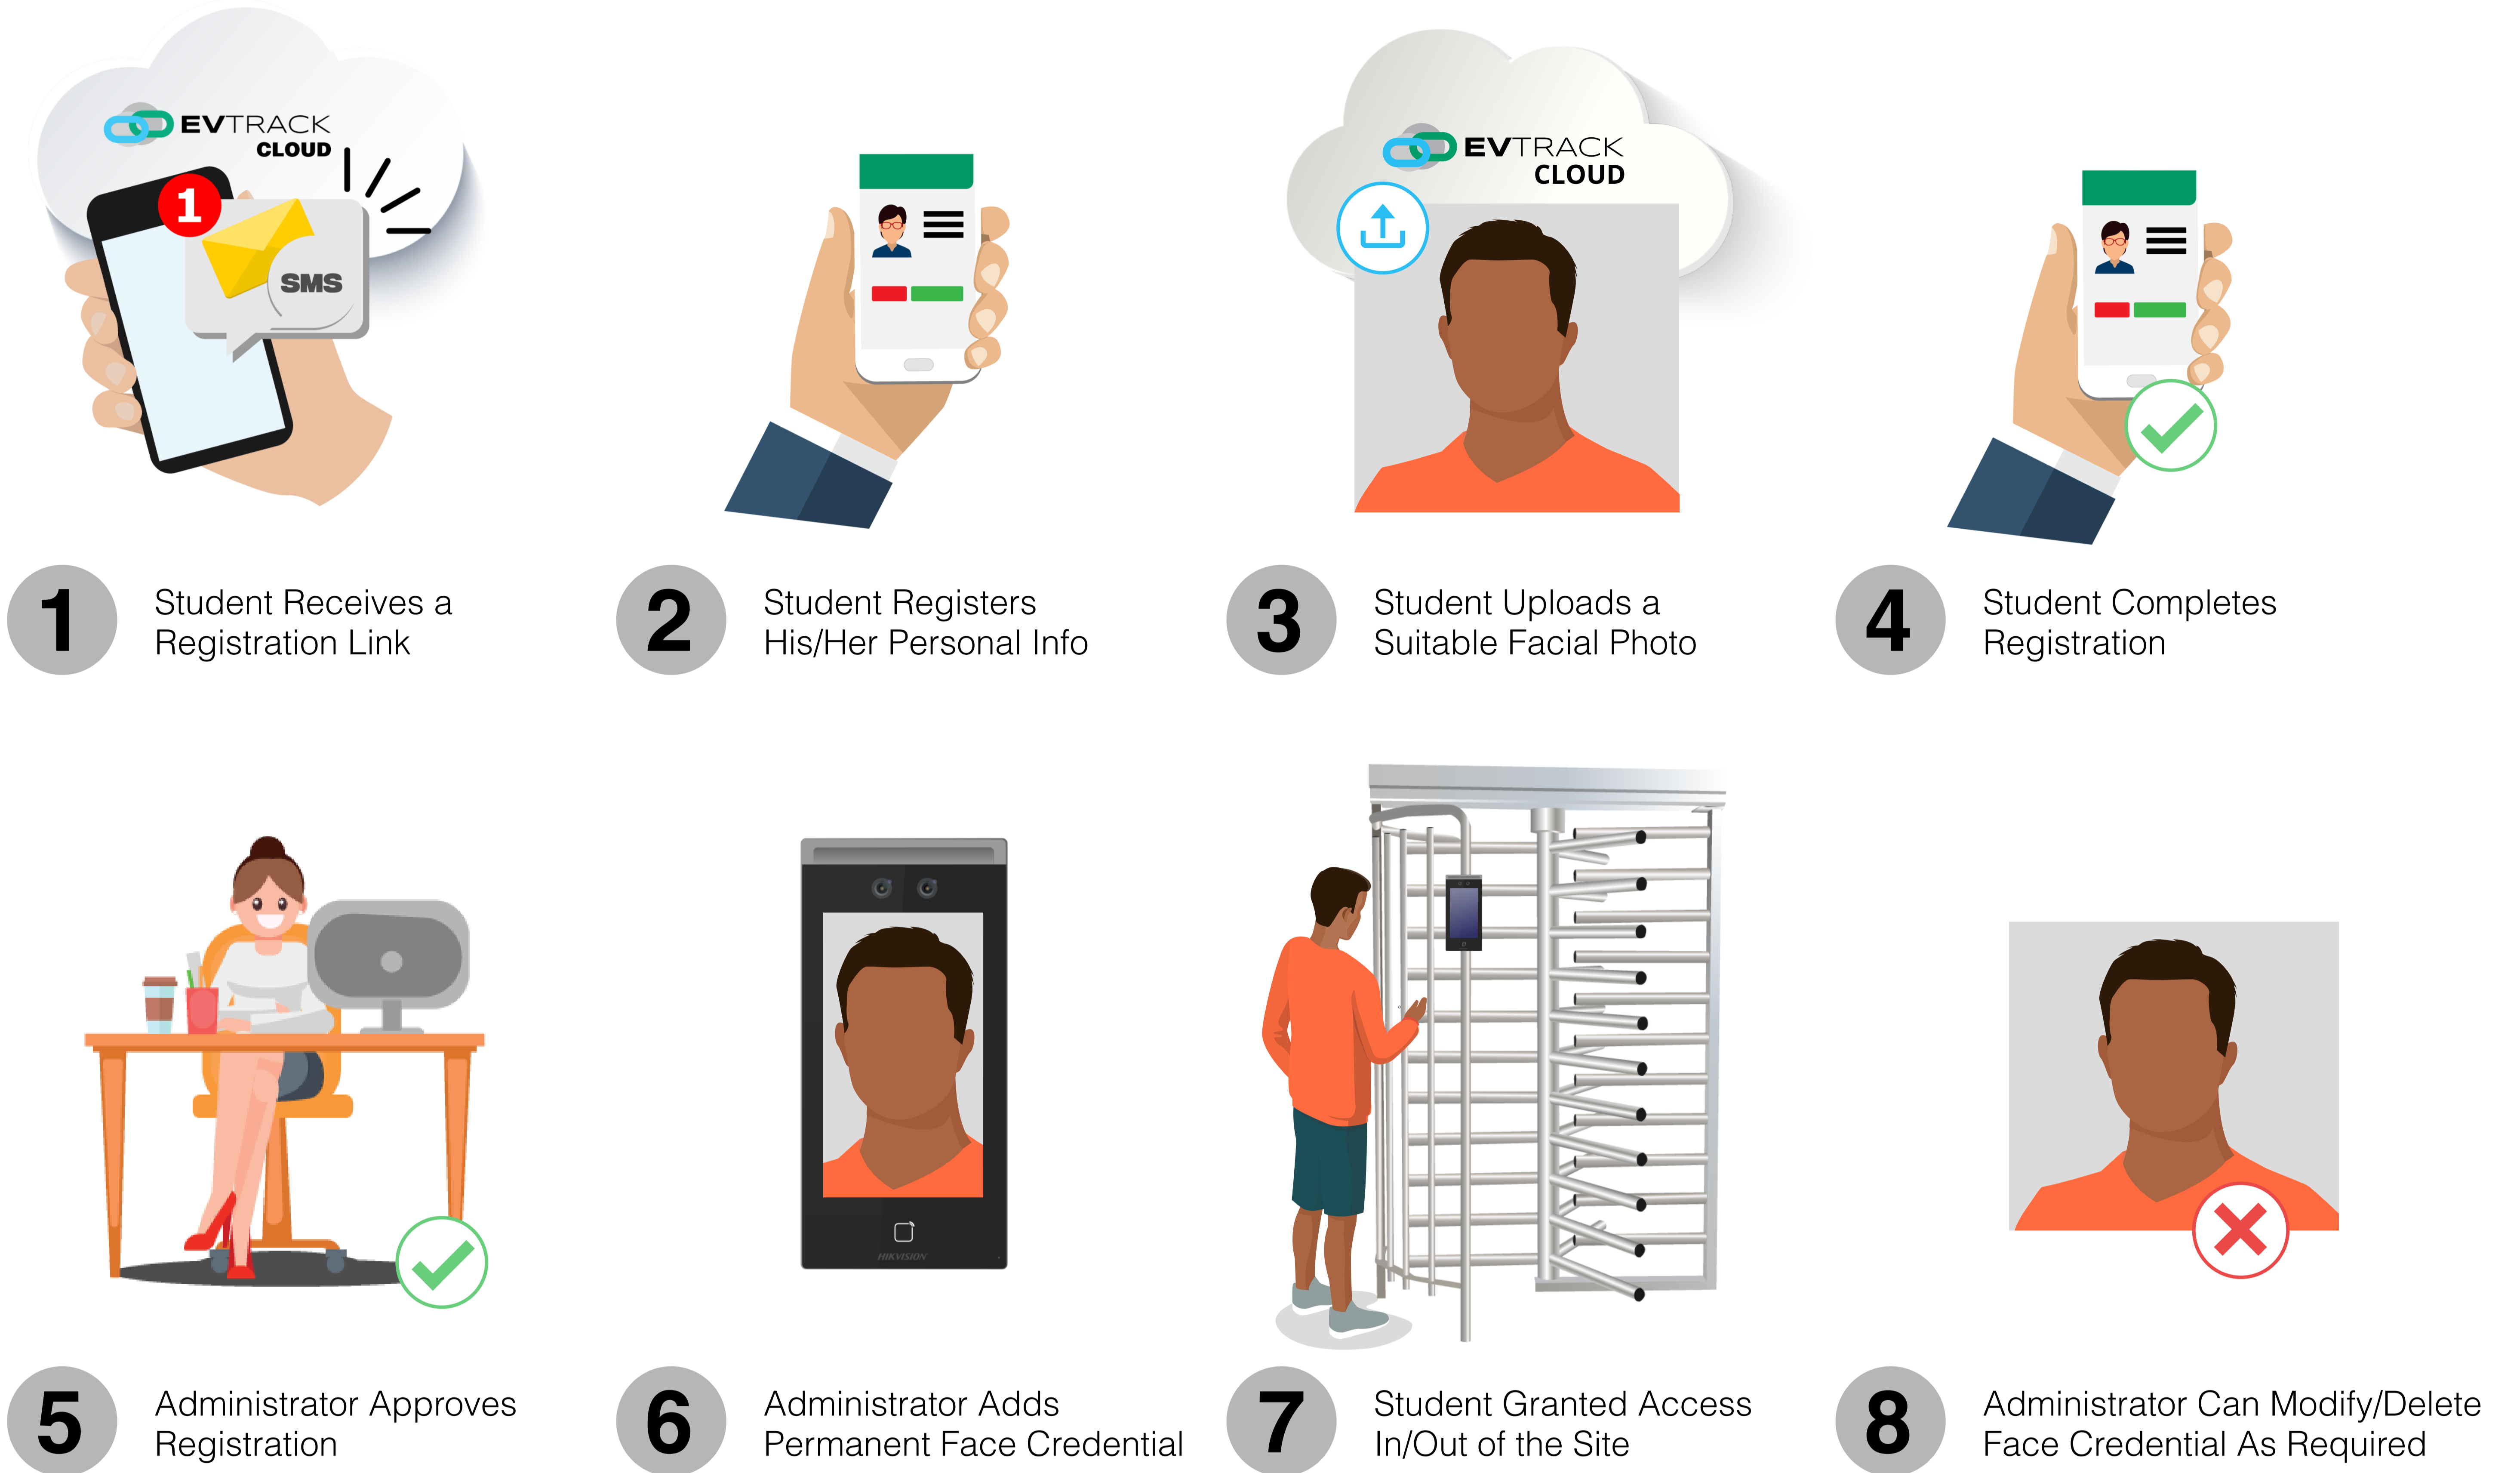

EvTrack provides seamless cloud access control for controlling access into and out of student accommodation, dormitories or student residences. This robust solution controls physical access control with facial recognition, QR codes or number plate recognition. The system's ease of use allows building and security management to remotely manage credentials and edit or delete these as required. It also facilitates the enrollment of new students or residents through a public registration link before even arriving on the site.

## FEATURES

- User Friendly solution for students and property managers
- Remote Registration by Weblink
- Support for QR Code Readers, Bio-metric Face Readers, RFID Readers and more
- Optional Visitor Management
- Easy Management of Students Credentials
- Cloud-Based or On-Premise Server versions.
- Full Audit Trail with exportable reports.
